Angelina MP

Angelina MP is our most-recent, most-modern design that keeps the jukebox experience in the hands of users by being our only jukebox that relies 100% on the mobile app for song play. MP is the perfect solution for those venues that are cashless and for those patrons who mostly live in a cashless social world.

All of the features that make TouchTunes the #1 choice:

- **Showcase the visual impact** of the Angelina jukebox and leverage the Angelina platform and components
- **Patrons enjoy the social experience** of browsing featured playlists, artists and songs on the jukebox
- **Patrons can interact** with quizzes, sweepstakes, surveys and other marketing programs such as TouchTunes Credit Craze
- **On screen messaging** alerts users to use the mobile app for song play. Screen also displays and patrons can interact with:
  - Song & artist search
  - Playlists
  - Featured artist promos
  - Games
  - Ads

Added value to drive more revenue and growth

- **Lower costs:** Built on the Angelina platform for high reliability with proven components, easy maintenance with the Angelina snap-in architecture, lower inventory costs and lower tech training costs. No cash collections means lower servicing costs
- **Drive more mobile app users** who are more engaged, more loyal and more profitable
- **Create opportunity** to grow existing accounts and acquire new locations in just about any type of venue:
  - **Venues with a younger crowd:** Mobile-only jukebox pay and play is perfect for younger patrons
  - **Distant venues:** Save time and money by reducing the number of visits required to your most distant venues
  - Upscale venues that **don't want patrons paying at a device**
  - Venues that want or need **a smaller jukebox footprint**
  - Venues with **high use of the TouchTunes mobile app**
